CORNER GUARD - EVA FOAM IMPACT PROTECTION STRIPS - BLACK/ORANGE

- Manufactured from EVA Foam
- Black coloured with highly reflective orange strips
- Product may be shortened to a desired length
- Can easily be mounted using glue or adhesive

The Corner Guard – EVA Foam Impact Protection Strips – Black/Orange is constructed from flexible Ethylene Vinyl Acetate (EVA) foam. EVA foam is both flexible and strong and is moisture and water resistant.

The corner guard can be used to shield parking wall edges, protecting your car from dings and scratches this guards can also be used in many settings such as, parking corners, in playrooms, classrooms, hospitals and government building.

You can cut the strip according to the length you require. With glue or adhesive, installation is simple. It is transferrable, moveable and adjustable in position as needed. The product comes with orange reflective stripes that are very reflective, this makes the product distinctive and practical.
